
Errata

- **BOD Detection Level Too Low**

1. **BOD Detection Level Too Low**

When BODLEVEL is unprogrammed, the BOD detection level may be too low for the device to operate safely.

Problem Fix/Workaround

Always program BODLEVEL to select the highest detection level.

Significant Datasheet Changes

The frequency of the internal calibrated RC oscillator is 1.2 MHz (not 1 MHz).

The low-voltage serial programming algorithm for chip erase was incorrect in previous revisions of the datasheet. This is documented correctly in the latest version of the datasheet.
